I, the undersigned, do hereby certify that I am the owner (duly authorized agent for the owner) of the animal described above, that I do hereby give Jeff Owens, DVM, his agents, servants, and/or representatives full and complete authority to perform the surgical procedure described as:

and to perform any other procedure that, at his discretion, may be useful to promote the health of the above described pet, and I do hereby and by the presents forever release the said Doctor, his agents, servants, or representatives from any and all liability arising from said surgery on said animal.

Pre-Anesthetic Blood Work (additional charge) Yes _____ No _____

(Strongly recommended for patients over 6 years of age)

Would you like to have your pet micro-chipped for an additional charge? This will include lifetime chip registration and 1 year HomeAgain® registration. Yes ____ No ____

Signature: _____ **date:** _____

Number you can be reached at today: _____

Pre Surgical Instructions:

- All procedures must be scheduled ahead of time. Surgical and Dental walk-ins will not be accepted.
- No food after midnight the night before the procedure.
- No water the morning of surgery.
- If your pet is currently taking any medication, vitamins, and/or injections, please contact the hospital to see if they should be given the morning of the procedure.
- Please make arrangements to have your pet dropped off between 8am-9am the morning of the procedure. If this is not possible, please call the hospital to make other arrangements.

Pre Anesthetic Blood Work:

The **Pre-Anesthetic Blood Profile** helps alert our surgeon to the presence of dehydration, anemia, infection, diabetes and/or kidney or liver disease that could complicate the procedure. These conditions may not be detected **without** a pre-anesthetic profile thus not allowing for the most appropriate and safest anesthetic regime to be administered. These tests are similar to those your own physician would run if you were to undergo anesthesia. In addition, these tests may be useful if your pet's health changes to develop faster, more accurate diagnoses and treatments.

This test includes (and tests for):

- **CBC:** PCV (Anemia), White Blood Cell Count (Infection) & Red Blood Cell Count (Anemia/Bleeding Disorder), Platelet Count (Clotting Disorder)
- **Profile:** BUN and Creatinine (Kidney), ALKP and ALT (Liver), Glucose (Sugar), Total Protein (Dehydration), and Electrolytes (Imbalance).

The Pre Anesthetic Blood Work is strongly suggested for patients over 6 years of age. However, it is left up to the discretion of the owner on whether or not it's performed. The procedure will still be performed even if the blood work is declined.
